PROFESSIONAL EXPERIENCE

Senior Backend Developer | Aug 2024 – present

NTT Limited Philippines Branch

Leadership & Collaboration

- Collaborate with senior team members to design a comprehensive system architecture.
- Mentor and supervise junior developers during both planning and implementation phases.

Platform & System Development

- Work with the team to build an online casino gaming platform.
- Collaborate with DevOps to ensure the platform is secure, scalable, and production-ready.
- Develop a localized casino system from scratch running under a LAN server.
- Build a full system from the base OS (Ubuntu), including creating hardware drivers and integrating them into an Electron client app—primarily developed by me while the rest of the team focuses on the online platform.
- Set up and work within a containerized development environment using VS Code.
- Utilize a self-hosted GitLab instance for efficient project management and version control.

Integrations

- Integrate third-party payment providers such as Xendit and UnionBank.

Hardware & Low-Level Development

- Using proprietary device libraries, develop C++ drivers for casino gaming terminal hardware (bill/ticket acceptors, printer, buttons, LEDs).
- Expose hardware functionality through a WebSocket server.

Configuration Analyst | Feb 2024 – Aug 2024

EClaro Philippines

Collaboration & Communication

- Work and collaborate effectively with multinational teams, including American, Indian, Pakistani, Russian, and British colleagues.
- Analyze business requirements and translate them into precise system configurations.

System Configuration & Implementation

- Utilize a highly configurable system and tailor it to meet specific client requirements.
- Use MongoDB pipelines and spreadsheet-like functions to configure the SaaS platform for insurance claims processing.
- Document all implemented configurations and perform thorough testing to ensure accuracy and reliability.

**PROFESSIONAL
EXPERIENCE
(CONT...)**

Tools & Project Management

- Use Jira for project management and task tracking.
- Maintain comprehensive documentation using Confluence.

PHP Developer | Apr 2023 – Feb 2024

1 Bit Software Development Corp .

Backend Development

- Develop RESTful APIs for internal systems.
- Build streaming servers using Laravel and Node.js.
- Implement microservices to enhance system scalability and modularity.
- Follow a Test-Driven Development (TDD) approach to ensure reliability and maintainability.
- Monitor and debug APIs using Laravel Telescope.
- Develop backend systems for proprietary casino games.
- Implement performance and security optimizations using techniques such as caching and Protobuf.

Framework Expertise

- Leverage Laravel tools and features, including events, observers, jobs, queue workers, scheduler, commands, ORM, and middleware.
- Integrate third-party casino game providers into the gaming platform.
- Utilize both MySQL and MongoDB as stateful services for application data.

Collaboration & Integration

- Work closely with frontend developers to integrate APIs seamlessly across the platform.
- Collaborate with frontend teams to implement Telegram-based web applications.

Development Environment & Deployment

- Dockerize the web development environment for consistency and portability.
- Configure and develop on remote devices using VS Code.
- Use private Git and GitHub repositories for source control.
- Implement CI/CD pipelines for automated deployments.
- Manage and deploy Telegram bots as notification systems for services.
- Create admin UI for microservices using DCAT Admin to control system behavior and data.

Project & Workflow Management

- Use Jira for project management and task tracking.

Junior Backend Developer | Oct 2020 – Apr 2023

MVSoftech, Inc., Calapan

Programming

- Develop frontend applications in ReactJS that consume .NET C# APIs.
- Build a Document Management System featuring fillable PDFs for customer form submission and automated document handling.
- Develop a Node.js application with MongoDB to generate data visualizations and dashboards using data sourced from a partner company.
- Create a Python script that monitors a directory for new files and automatically imports them into the system.

**PROFESSIONAL
EXPERIENCE
(CONT...)**

- Customize and enhance an existing HRIS and project management system (Laravel 7) to align with current business processes.
- Integrate the HRIS with a Node.js application to import and synchronize employee data.
- Create a time logging system using a barcode scanner, integrate it with the HRIS, implement employee ID printing, and deploy a thin-client kiosk for on-site use.
- Develop a plugin for UISP's UCRM to broadcast promotional SMS messages using the Itexmo API.
- Build a simple UI for redeploying a WordPress project using Duplicator.

Servers

- Set up and maintain servers and services for the organization.
- Deploy and manage a self-hosted Nextcloud instance as a private file-sharing solution.
- Configure and maintain Linux-based virtual machines, including setting up replication to prevent data loss.
- Dockerize web applications for consistent and efficient deployment.
- Set up a reverse proxy for streamlined web app deployment and provide a UI to simplify service rollouts.
- Utilize Cloudflare for domain management and to add an additional layer of security to web applications.
- Deploy and manage a local DNS service to improve development workflow.
- Deploy and maintain a WireGuard VPN for secure remote access.
- Set up an on-premise GitLab server along with GitLab Runners for CI/CD.
- Deploy an on-premise BookStack instance for internal documentation.
- Implement automatic deployments using GitHub webhooks triggered on push events.
- Deploy Portainer for container management and monitoring.
- Deploy a web-based UI for MongoDB management.

Others

- Work with interns and guide them through their training and assigned tasks.
- Assist in conducting system audits on clients' existing systems to identify areas for improvement and propose solutions.
- Utilize GitLab for code repository management and project coordination.
- Collaborate with network engineers on network-related tasks such as port forwarding, managing public IPs, and deploying services behind Cloudflare with multiple subdomains.

Management Information System | Jul 2019 – Sept 2020

Mindoro State University

- Set up and maintain a computer laboratory for campus use.
- Troubleshoot and resolve hardware and software issues on electronic devices.
- Configure, troubleshoot, and maintain campus networks and network devices.
- Assist employees with technical issues as needed.
- Develop a campus enrollment system using a MVC PHP framework.
- Facilitate and support students' enrollment processes.

EDUCATION

Mindoro State University (Calapan City Campus) | 2015–2019

Bachelor of Science in Information and Technology

- 2017 – Computer Programmer of the Year
- 2016–2017 – Academic Scholarship (70% off Tuition Fee)

Batangas State University (Alangilan Campus) | 2019 – 2021

Master of Science in Information Technology

TRAININGS / SEMINAR ATTENDED

Training–Workshop on Campus Network Design and Virtualization Infrastructure

December 16–18, 2019

Mindoro State University

- by : Mr Ofrates C. Siringan

Cloud of Things: The Intersection of Cloud Computing and IoT Innovations

October 20, 2019

Batangas State University

- Graduate School Acquaintance Program
-

SKILLS

Technical Skills

Frontend Development

- HTML, CSS, JavaScript, jQuery
- ReactJS
- Electron

Backend Development & Frameworks

- PHP
- Laravel
- Node.js
- C#
- REST API
- Microservices
- TDD (Test–Driven Development)
- DCAT Admin (Chinese fork of Laravel Admin)

Databases & Caching

- MySQL
- MongoDB
- Redis / Memcached
- RabbitMQ
- Protobuf

DevOps & Deployment

- Git, GitHub, GitLab

- Git, GitHub, GitLab

- GitHub Actions

- CI/CD pipelines

- Apache, Nginx

- Docker / Devcontainer

- Linux

- Virtual Machines & Containers

- Shell scripting

Hardware & IoT

- IoT / Microcontrollers

- Driver development

- Troubleshooting hardware, software, and networks

Integration & Third–Party Services

- Third–party payment providers (Xendit, UnionBank)

- Third–party game provider integration

- Telegram Bot

General Programming & Concepts

- Python scripting

- OOP

- WebSockets

- Gaming platform development

SKILLS

Soft Skills

- Fast Learner
- Goal Oriented
- Good knowledge of fundamentals of computer programming
- Work under pressure
- Good Problem solving skills
- Hardworker
